

Smart Contract Security Report

Vault.sol

Generated	2026-07-20T14:30:45.123000Z
CyberShield AI	0.1.0
Source SHA-256	f17decf1067e2440ca95baffa93febd8fd0f6d04aa9f07057248ae5d24f09627
Total execution	91.75 ms

2 canonical vulnerabilities from 3 analyzer findings

Executive Summary

CyberShield AI correlated 3 normalized analyzer findings into 2 canonical vulnerabilities for Vault.sol. All enabled analyzers completed successfully. Confidence scores measure cross-analyzer agreement and should be considered alongside severity and evidence.

Severity Pie Summary

Consensus Table

#	Finding	Severity	Confidence	Analyzers
1	Reentrancy	High	70.8%	mythril, slither
2	Avoid low-level calls	Low	66.7%	solhint

Analyzer Comparison

Analyzer	Status	Runtime	Findings	Error
slither	Succeeded	42.25 ms	1	—
mythril	Succeeded	81.50 ms	1	—
solhint	Succeeded	9.75 ms	1	—

Detailed Findings

1. Reentrancy

Severity	High
Confidence	70.8%
Location	contracts/Vault.sol:8-9:9-45
Analyzers	mythril, slither
Rules	SWC-107

A caller can regain control before the state update completes.

External call occurs before the sender balance is cleared.

Supporting evidence

mythril · SWC-107 · Medium

A caller can regain control before the state update completes.

slither · SWC-107 · High

External call occurs before the sender balance is cleared.

2. Avoid low-level calls

Severity	Low
Confidence	66.7%
Location	contracts/Vault.sol:8:9-45
Analyzers	solhint
Rules	avoid-low-level-calls

Low-level call usage requires explicit defensive handling.

Supporting evidence

solhint · avoid-low-level-calls · Low

Low-level call usage requires explicit defensive handling.

Recommendations

- Block deployment until all critical and high-severity findings are remediated and independently retested.
- Triage low and informational findings, documenting accepted risks and planned hardening work.
- Review every supporting analyzer finding before changing code; consensus scores express evidence agreement, not exploitability.
- Re-run all enabled analyzers after remediation and compare the new report with this baseline.
